Enclosed is your one 1881 O Morgan dollars plus computer prints of photographs of new variety taken with a digital camera thru a stereo microscope. Another *new* 1881 O listing!

My comments on the coin are as follows:

PCGS 467529– *New* VAM 70. Yes, O m/m set left same as VAMs 23, 35, 54, 57, 61, 64. Middle of eagle's rt wing over polished as in VAMs 23 & 57. Don't know about VAM 35. Unlisted dbld cap top & upper rt edge plus dbld U in PLURIBUS and all of UNUM.

The description of the new die variety is as follows:

1881 O

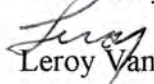

70 **III²47 • C³1 (Doubled Cap Top, UNUM, O Set Left)** (?) **I-2 R-5**

Obverse III²47– Slightly doubled Phrygian cap top and upper right edges, UNUM and right U in PLURIBUS towards rim. Left 8 has tiny spike at upper left inside of upper lop. *Die marker*- Two vertical short polishing lines in rear cap depression below ribbon.

Reverse C³1- II O mintmark set left with middle of eagle's right wing over polished, as in VAMs 23 & 57.

Thanks again for sharing your coin die varieties!

Yours truly,

Leroy Van Allen
